Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
2. The disclosure is objected to because of the following informalities: the application information on page 1 lines 2-9 and page 7 line 19 should be updated to include patent numbers.

Appropriate correction is required.

Double Patenting

3. Claims 1-2, 4-21 and 23-24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6,064,653. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application is a broader version of the patented claims. For example, claim 1 of the present application are not patentably distinct from claim 1 of the patent except the converting step is not claimed. Both claims recites a method comprising determining quality of service (equivalent to monitoring); comparing the quality of service (monitored condition and if below threshold); routing thought data network (monitoring step; data are passing through the data network); and routing through PSTN network if level not exceeded (routing step to second gateway). It would have been obvious to an ordinary person skilled in the

art at the time of the invention to not claim the converting step in order to try to obtain broader coverage.
